## **1. Nature of operations and going concern**

Power Nickel Inc. (formerly Chilean Metals Inc.) (the "Company" or "Power Nickel") is a mineral exploration company and is in the business of acquiring and exploring mineral properties in Chile and Canada. On July 9, 2021, the Company changed its name from "Chilean Metals Inc." to "Power Nickel Inc."

The Company is a publicly listed company incorporated in Canada with limited liability under the legislation of the Province of British Columbia. The Company's shares are listed on the TSX Venture Exchange ("TSX-V"), and Santiago Stock Exchange, Venture Market. The head office and principal address of the Company are located at the Canadian Venture Building, 82 Richmond Street East, Suite 202, Toronto, Ontario, M5C 1P1. The Company's registered and records office address is at Suite 700 – 595 Burrard Street, PO Box 49290, Vancouver, British Columbia, Canada, V7X 1S8.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements, unregistered claims, aboriginal claims and non-compliance with regulatory and environmental requirements. The Company's property interests may also be subject to increases in taxes and royalties, renegotiation of contracts, and political uncertainty. The Company's Chilean mineral property maintenance payments are in arrears (see note 13) and as a result, the Copiapó Court has been notified by the General Treasury of the Republic of Chile. The Copiapó Court may initiate the auction of the properties. If the Company's claims are put up for auction the Company, as concession holder, is not allowed to place bids on its claims under auction; however, the concession holder may remove a concession from auction by paying the penalty amount which is equal to double the patent amount outstanding. Accordingly, there is a risk that the Company will not be able to retain title to its mineral claims in Chile.

Since December 31, 2019, the outbreak of the novel strain of coronavirus, specifically identified as "COVID-19", has resulted in governments worldwide enacting emergency measures to combat the spread of the virus. These measures, which include the implementation of travel bans, self-imposed quarantine periods and social distancing, have caused material disruption to businesses globally resulting in an economic slowdown. Global equity markets have experienced significant volatility and weakness. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions. The duration and impact of the COVID-19 outbreak is unknown at this time, as is the efficacy of the government and central bank interventions.

These unaudited condensed consolidated interim financial statements have been prepared on the going concern basis, which assumes that the Company will be able to continue as a going concern and realize its assets and discharge its liabilities in the normal course of business. These unaudited condensed consolidated interim financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern. During the three months ended March 31, 2022, the Company incurred a net loss of \$844,245 (three months ended March 31, 2021 - \$5,807,046). As at March 31, 2022, the Company has incurred significant losses since inception totaling \$76,374,194 (December 31, 2021 - \$75,554,759). As at March 31, 2022, the Company has a working capital deficiency of \$1,293,270 (December 31, 2021 - working capital deficiency of \$644,362); the continuing operations of the Company are dependent on its ability to generate future cash flows or obtain additional financing. Management is of the opinion that additional funds will be obtained from external financing to meet the Company's liabilities and commitments as they become due, although there is a risk that additional financing will not be available on a timely basis or on terms acceptable to the Company. These factors indicate the existence of material uncertainties that cast significant doubt as to the Company's ability to continue as a going concern and accordingly use accounting principles applicable to a going concern.

The areas involving a higher degree of judgment or complexity or areas where assumptions and estimates are significant to these unaudited condensed consolidated interim financial statements were the same as those that applied to the Company's annual consolidated financial statements as at and for the year ended December 31, 2022, except as noted below.

#### ***New standards not yet adopted***

##### *Classification of Liabilities as Current or Non-Current (Amendments to IAS 1)*

The IASB has published Classification of Liabilities as Current or Non-Current (Amendments to IAS 1) which clarifies the guidance on whether a liability should be classified as either current or non-current. The amendments:

- clarify that the classification of liabilities as current or non-current should only be based on rights that are in place "at the end of the reporting period"
- clarify that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability
- make clear that settlement includes transfers to the counterparty of cash, equity instruments, other assets or services that result in extinguishment of the liability.

This amendment is effective for annual periods beginning on or after January 1, 2023. Earlier application is permitted. The extent of the impact of adoption of this amendment has not yet been determined.

The Statute-barred Claims related to expenses billed by and third party liabilities incurred prior to December 2015. However, for accounting purposes under IFRS, a debt can only be removed from the Company's statement of financial position when it is extinguished meaning only when the contract is discharged or canceled or expires. The effect of the Limitations Act is to prevent a creditor from enforcing an obligation but it does not formally extinguish the debt for accounting purposes. It is the position of management of the Company that the Statute-barred Claims cannot be enforced by the creditors, do not create any obligation for the Company to pay out any cash and do not affect the financial or working capital position of the Company. The Statute-barred Claims are required to be reflected on the Company's statement of financial position as a result of the current interpretation of IFRS, but they are classified as long-term liabilities since the Company has no intention or obligation to pay these Statute-barred Claims and the creditors cannot enforce payment of the Statute-barred Claims. While inclusion of these items is intended solely to comply with the requirements of IFRS, the Company in no way acknowledges any of the Statute-barred Claims.
